Testi in italiano

Lingua insegnamento	INGLESE
Obiettivi formativi	The course aims at providing advanced knowledge on the transformation of contemporary security, providing a comprehensive conceptual toolkit to understand the role of actors, scenarios and security threats in XXI Century's security context. The course will illustrate the debate over causes and consequences of complex social phenomenon like civil wars, terrorism, peacekeeping, multilateral peace support operations, military transformation, cyber security. The course will also examine military innovation, military transformation and the evolution of defense policy in Europe in the post Cold war. The course aims to provide students the proper tools to understand the complexity of contemporary security, also through active learning and the analysis of specific cases.
Contenuti (Dipl.Sup.)	The course aims to illustrate the evolution of contemporary security, from peacekeeping to terrorism. The course provides the conceptual tools to better understand the transformation of international security also through active learning and participation. The course will focus on issues such as: the transformation of contemporary conflicts, transnational terrorism at the time of the ISIL, counter-insurgency; peacekeeping operations, fragile states and organized crime, military transformation in Europe; technology and war, from drones to cyber-security.
Prerequisiti	It is strongly recommended that you have already taken courses in International Relations, History of International Relations, and possibly also Introduction to Security Studies.
Metodi didattici	The course will take the form of seminars. Following an introduction structured as a lecture, students are expected to discuss the topic of the day and give presentations. Reading class material in advance is thus essential to participate successfully in the course.
Modalità di verifica dell'apprendimento	Attending students will be assessed with a mixed method: In class activity will give 50% of the final grade (35% in class presentation + 15% active participation); a written exam on the readings with multiple-choice questions and open questions will give 50% of the final grade. Non-attending students will have to take the written exam for 100% of the grade.
